

Lower branches of trees have been cut back to the west of the 30mph sign to give a clearer view of the signs on the bend

A - new post in grass verge east of Old Road Junction - for east bound traffic

B - new post in pavement just west of telegraph pole west of Old Road Junction - for east bound traffic

C - replacement post in pavement - for west bound traffic and also carrying the 30 mph repeater sign

D - replacement post in grass verge west of Bridge Farm Junction - for west bound traffic and also carrying the Neighbourhood Watch sign

Trees and bushes need cutting back east of the 30mph sign in the autumn as they are obscuring signs on the bend
